# Work With Us

*Want to make the web a better place for more than a billion people each month? We're hiring.*

[Open positions](#)

**HOW WE WORK** **Choose your own adventure** · Everyone works from the location they choose. We're spread out all over the world in more than 60 countries. We track about 70 percent of our projects on [P2-themed](#) WordPress.com blogs, 25 percent in private chat rooms, and the rest on Slack. Because of the geographic variance, we're active 24/7. We care about the work you produce, not just the hours you put in.

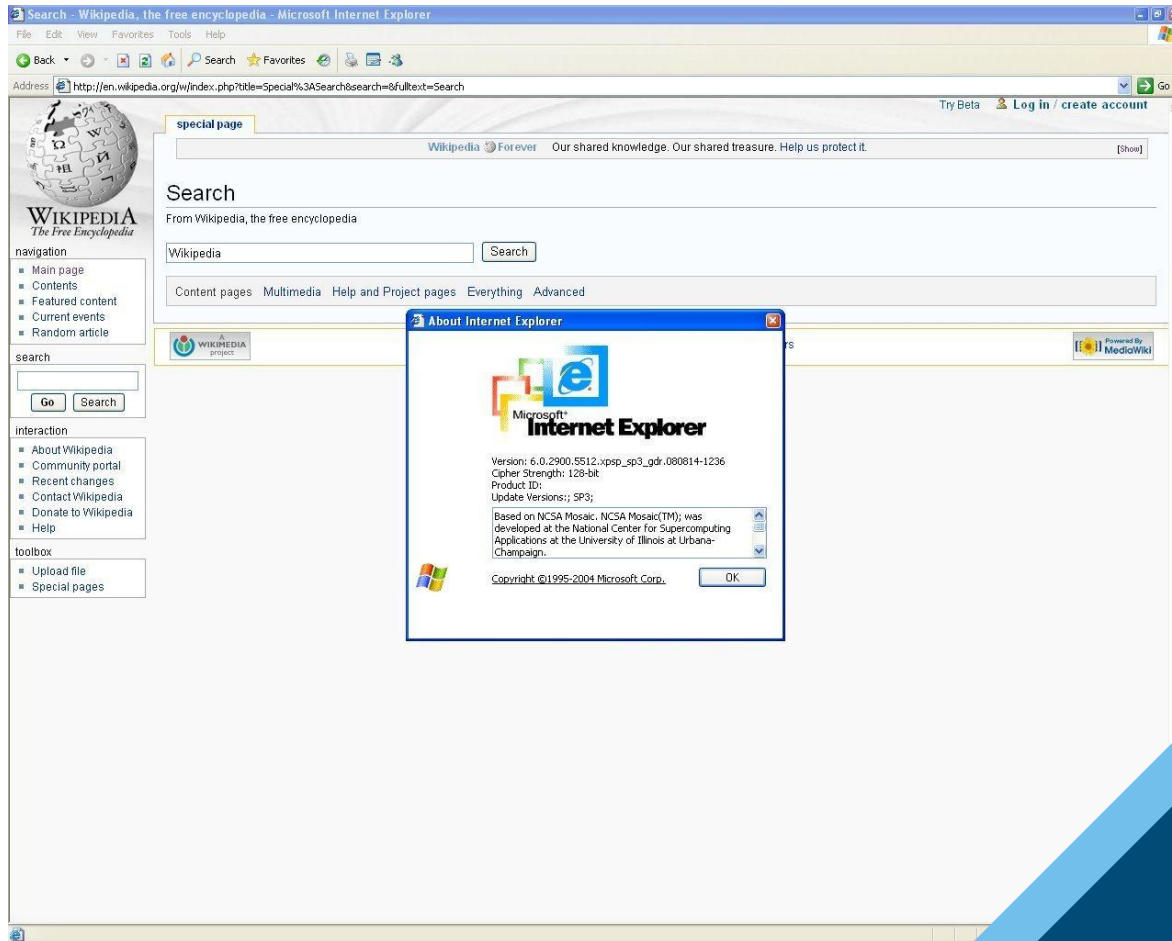

**Coming on board** · When you make it past the interview stage we'll do a project together on contract, typically lasting between two to six weeks depending on how much time you can spend, to see how we work together ([learn more about our global hiring guidelines](#)). When you join full-time, you'll do customer support for WordPress.com for your first two weeks and spend a week in support annually, for evermore, regardless of your position. We believe an early and ongoing connection with the people who use our products is irreplaceable. (If you're applying for an engineering position, you can [learn more about the process you can expect](#).)

# El *alcance* y el *cierre*

Scope & Closure

WORDCAMP  
GUAYAQUIL 19

Donde *viven* variables  
que defino en mi  
código? El *Scope* nos  
da la respuesta

WORDCAMP  
GUAYAQUIL 19

Hasta donde tienen  
*alcance* las variables  
en mi código? El  
*closure* lo define

WORDCAMP

# Qué es *esto*?

this

WORDCAMP  
GUAYAQUIL 19

*this*, es el contexto en el cual una función se ejecuta...

WORDCAMP  
GUAYAQUIL 19

... hay varias maneras de ejecutar una funcion, tambien de modificar el contexto.
